**A RELIABLE SEED SERVICE
FOR 57 YEARS**

T. LEE ADAMS SEED CO.

Home Office and Main Store

417 WALNUT ST.

KANSAS CITY, MO.

Branch Store:

107 E. Lexington - Independence, Mo.

SINCE 1882 . . .

WHEN T. Lee Adams opened his seed store in 1882, he established a reputation for fair dealing. Under the guidance of Mr. Adams' sound principles, his original seed store has grown to be the largest and most dependable source of seed supply in Missouri. Along with the dependability and reliability of the seeds we sell, service and convenience is always a large consideration.

TESTED SEEDS

We conduct our own modern seed laboratory and trial grounds. Our seeds are just as represented. If they prove otherwise, we will refill the orders free of charge or refund the money you paid us for same. If you do not find the article or variety you want, put it on the order anyway, as we carry in stock many items that we do not have room to list in this catalog.

ADVISORY SERVICE

We are glad to answer letters in detail regarding your garden and farm problems, but all requests for information should be written on a separate sheet of paper, and not on orders. It is always a pleasure to help you make your garden a success, and we take pains to answer inquiries promptly and fully.

FREE DELIVERY

We deliver free in the United States, by mail, freight or express, our option, to any express or post office, all Vegetable and Flower Seeds. All other articles, including bulbs, are quoted f. o. b. Kansas City, Mo., and postage must be added as per table where goods are desired by parcel post.

Write your name and address distinctly and in full; please use the order sheet and envelope inserted in this catalog.

GENERAL INFORMATION

ORDER EARLY! Our rush comes in March and April. By ordering early, you will receive better service from full stocks.

USE THE ORDER SHEET, as it will be easier for us to fill your order and ship it correctly. Give all necessary information on the order sheet, and if freight or express office is different from your post office address, give both.

PLEASE PRINT YOUR NAME AND ADDRESS on the order sheet, very plainly. Each year we are unable to read the names and addresses on many orders we receive, which means delay and often loss of money.

Poisons cannot be sent by mail. Liquids and goods packed in glass should be sent by express.

We must decline sending goods C. O. D. unless 25 per cent of their value accompanies the order.

HOW TO SEND MONEY

Remittances may be sent either in the form of a Money Order, Bank Check or Draft, or if Currency is sent, it should be registered. Postage stamps are satisfactory for small amounts.

DOMESTIC PARCEL POST RATES		First	Additional
Within the U. S. and Possessions		Pound	Pound
Zones from Kansas City, Mo.		or Fraction	or Fraction
		Each	
Local—Kansas City.....		7c	1c (2 lbs.)
1st)			
2nd) Zone within.....	150 mi.	8c	1.1c
3rd Zone within.....	150 to 300 mi.	9c	2c
4th Zone within.....	300 to 600 mi.	10c	3.5c
5th Zone within.....	600 to 1000 mi.	11c	5.3c
6th Zone within.....	1000 to 1400 mi.	12c	7c
7th Zone within.....	1400 to 1800 mi.	14c	9c
8th Zone over.....	1800 miles	15c	11c

Parcel post packages are mailed anywhere within the United States or its possessions, weighing up to and including 70 pounds. Shipments of 20 ponunds or over are as cheap if sent by express beyond the third zone.

We give no warranty, express or implied, as to description, quality, or any other matter of any seeds, bulbs or plants we send out, and we will not be in any way responsible for the crop. If the purchaser does not accept the goods on these terms, they are at once to be returned.

RUBBER BANDS AND APRONS

Price per lb., any size, 75c, postpaid. Rubber Aprons, \$1.75.

DUSTERS—COMPRESSED AIR SPRAYERS

and SPRINKLERS

AMERICAN BEAUTY

DUSTER

The most powerful hand duster. Has a large, powerful bellows that throws dust to top of 25-ft trees. A man will average eight acres per day on trees. Dusts truck crops at an average walking speed, and dusts under side of leaves. Has a spiral agitator that crushes and grinds the dust and feeds directly into moving air blast; does not choke or clog. Has efficient regulator for discharge control. Considered the standard of efficiency. **Price, \$22.00.**

The **Siren Pump** is a high pressure spray pump adapted for spraying orchards, vineyards, shrubbery, shade trees, potatoes and field crops; for whitewashing, disinfecting, spraying stock dip and fly oils, washing windows and automobiles, fighting fires and numerous other purposes.

Sprayer only.....	\$4.95	Knapsack only.....	\$6.95
Sprayer complete with Knapsack.....	\$9.55		

FERTILIZERS

MILORGANITE

The ideal turf fertilizer. Milorganite is a unique plant food for grass. It is free from weed seeds, and more effective than natural manures without producing objectionable odors and unsightly surfaces. Being supplied with all the growth producing plant food elements, it differs from ordinary fertilizers by producing results over longer periods. Applied in the spring, Milorganite maintains rich velvety grass throughout the summer. A second application in early fall is often advisable to produce vigorous turf capable of withstanding adverse winter weather, and enables the grass to start off earlier in the spring. You can obtain equally good turf by using 30 to 40 pounds Milorganite per 1000 square feet of area, at each application. In renovating old lawns where the grass is unusually thin, the use of some grass seed is advisable. It should be sowed after applying the Milorganite and raked lightly to barely cover the seed. 100-lb. bag, \$3.25.

Vigoro. Complete plant food, clean and odorless. 10 lbs., 85c; 25 lbs., \$1.50; 50 lbs., \$2.40; 100 lbs., \$4.00.

Super Phosphate. Guaranteed analysis—available phosphoric acid 16.00 per cent. Valuable for Winter Wheat, Rye, Barley, Clover, Alfalfa, Field Beans, Field Peas and all crops needing available phosphoric acid. Should be sown broadcast at a rate not to exceed 500 lbs. to the acre. 100-lb. bag, \$2.50; ton, \$40.00.

Lime, Hydrated. Used to neutralize the soil if sour or acid. On the majority of lawns a 100-lb. sack will cover approximately 800 square feet. 50-lb. bag, \$1.00.

Blood (Dried). Excellent for indoor culture of flowering plants, such as carnations, roses, etc. Its chief element is nitrogen. 100 lbs., \$4.

Steamed Bone Meal. One of the most useful forms from which to furnish both nitrogen and phosphoric acid in slowly available forms. 100 lbs., \$4.50.

Sulphate of Ammonia. Used for its nitrogen. Use 1 lb. to 50 square feet of ground or bench, or a tablespoonful to a bushel of soil, or 3 gallons of water. 25 lbs., \$1.50; 50 lbs., \$2.50; 100 lbs., \$4.00; 500 lbs., \$17.50.

Charcoal. Unexcelled as a soil sweetener. Two grades; fine pulverized and hickory nut size. Packed in 50-lb. bags. Per 100 lbs., \$3.50.

Nitrate of Soda. Use as a top dressing at the rate of 100 lbs. per acre on vegetables, when plants are well established. Price (subject to market changes), 5 lbs., 50c; 10 lbs., 75c; 25 lbs., \$1.50; 50 lbs., \$2.50; 100 lbs., \$4.00; 500 lbs., \$17.50. Write for prices on larger quantities.

PEAT MOSS

Pete Moss (Torf Mull). A complete soil builder. This will produce as good results as the richest manure, without the addition of disease and fungus spores which are found in all manure. Shipped in heavily compressed bales about 21x21x40 inches, sufficient to cover 240 square feet one inch deep.

Per bale, \$3.50

Above Prices Not Postpaid.

FLORISTS' & MISCELLANEOUS SUPPLIES

COTTON TWINE

Watering Troughs	Leg Bands
Feeders	Cyster Shell

Our branch store at Independence, Missouri, carries a complete line of
BIRD CAGES; also CANARY BIRDS and LOVE BIRDS.

LAWN GRASS SEEDS

HOW TO MAKE A LAWN

The best soil is a good medium texture; the surface should be thoroughly pulverized and smoothed to the desired grade, removing all large stones, roots and hardened pieces of earth. When the soil is firm, level and suitably moist, sow **Adams' Lawn Grass Seed** at the rate of 75 to 100 pounds per acre, or a pound to 300 square feet (a space 15x20). It is unwise to be too economical in the quantity of seed used, if the best results are desired. The seed should be sown broadcast and as evenly as possible, then give a thorough rolling or tamp well with the back of a spade. Seed must be well firmed in soil. Our lawn seed does not contain Crab Grass seed.

SOWING

The sowing of grass seed in late summer or fall is highly recommended. Sowing at this time of year causes the young grass to "stool out," whereas if planted during hot weather it tends to grow tall and slender. For this reason it requires a greater quantity of seed. Fall planting is also beneficial in that it prevents the re-seeding of weeds. Spring planting is also satisfactory, but should be done early in order that the young grass will obtain a good growth before warm weather.

Water lightly but thoroughly. It is not advisable to "soak" the ground until the new grass has been cut.

New turf should have its first cutting when the grass is from 2 to 3 inches long. Set the blades of the mower high to clip only the ends of the young grass.

The continuous growing of one crop impoverishes the richest soil. Blue Grass is no exception and when not fed with proper fertilizer, soon turns sour. Blue Grass is a permanent crop and requires richer feeding than most crops. It must be thoroughly enriched if it is to live and grow.

KENTUCKY BLUE GRASS—Fancy Clean

Kentucky Blue Grass is the most nutritious hardy and valuable of all northern grasses. Sown with White Clover it forms a splendid lawn; for this purpose use not less than 54 pounds of Blue Grass and 14 pounds of White Clover per acre. If sown by itself for meadow or pasturage, use about 28 pounds per acre. 1 lb., 25c; 5 lbs., \$1.00; 10 lbs., \$1.85.

ADAMS' "EVERGREEN" LAWN GRASS

This special mixture produces beautiful and permanent lawns. It is made from our own formula and composed of grasses which are adapted for the purpose of producing turf which retains its rich green color and velvety appearance throughout the entire summer and fall. Our seed is thoroughly re-cleaned. 1 lb., 25c; 5 lbs., \$1.00; 10 lbs., \$1.85.

SHADY PLACE GRASS

For sowing in shady places we recommend the use of this special mixture. It will quickly produce an abundant and even growth of beautiful green grass. The grasses used in making this special mixture are only those that are well adapted for growing in shade. 1 lb., 30c; 5 lbs., \$1.25; 10 lbs., \$2.00.

WHITE DUTCH CLOVER SEED

Excellent for use on lawns; forms a close herbage and remains green throughout the season. 1 lb., 65c; 5 lbs., \$3.00.

BERMUDA GRASS

Will grow on almost any soil. One of the finest grasses to sow for summer lawns, especially in the South. Seed should be planted in the spring or late summer when the weather is warm and moist. Have the ground well prepared and sow the seed at the rate of from 5 to 10 pounds to 1000 square feet. In the fall Red Top or Rye Grass can be sown on the Bermuda Grass and in this way will produce green grass all through the winter except where the climate is extremely cold. We do not recommend Bermuda Grass for use north of the central parts of Missouri and Kansas. 1 lb., 50c; 5 lbs., \$2.25.

RED TOP

Red Top is a fine grass for the lawn. It is a perennial with the creeping habit of growth, which makes a coarse, loose turf. The grass thrives best in low, moist soil and will stand all kinds of wet weather or considerable drought. 1 lb., 25c; 5 lbs., \$1.00.

COOS COUNTY SEASIDE BENT

A strictly creeping grass. Ideal for putting greens. Requires the frequent cutting and top dressing necessary to all the creeping varieties to keep the naturally recumbent plants upright. Will thrive with less water than commercial vegetative strains. 1 lb., \$1.25; 5 lbs., \$5.00.

ROUGH STALKED MEADOW GRASS

Especially valuable for shady lawns. Creeping plants with narrow, flat leaf blades; adapted to all soils. 1 lb., 50c; 5 lbs., \$2.25.

PERENNIAL RYE GRASS

This is a very quick growing, shortlived perennial grass. It has a tendency to grow in tufts and has tall, broad, flat leaves. 1 lb., 25c; 5 lbs., \$1.00.

DOMESTIC RYE GRASS

An annual grass very similar to the Perennial Rye. Very valuable for its use in lawn mixtures. 1 lb., 25c; 5 lbs., \$1.00.

Morning Glory—Heavenly Blue
